DETAILED ACTION

Oath/Declaration

1. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because it does not identify who is the first and second inventor.

Drawings

2. The drawings are objected to because
 - A) the applicant did not label any of the components in figure 1.Correction is required.

Specification

3. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3661

5. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Sigl, US Patent no. 5,794,735.

As per claim 1, Sigl discloses how to

- determine the actual speed of the vehicle;
- predefine a set-point speed;
- detect whether the vehicle is travelling on a descent;
- calculate at least one manipulated variable based on the actual speed and the set-point speed only when the vehicle is detected as traveling on a descent;
- and
- influence the actual speed of the vehicle on the basis of the at least one manipulated variable (column 3, lines 1-67 and column 4, lines 1-2).

As per claim 2, Sigl discloses at least that one manipulated variable is calculated only when one switch is activated.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over Sigl, US Patent no. 5,794,735.

As per claim 8, Sigl discloses how to:

Art Unit: 3661

- determine the actual speed of the vehicle;
- predefine a set-point speed;
- detect whether the vehicle is travelling on a descent;
- calculate at least one manipulated variable based on the actual speed and the set-point speed only when the vehicle is detected as traveling on a descent;
and
- influence the actual speed of the vehicle on the basis of the at least one manipulated variable (column 3, lines 1-67 and column 4, lines 1-2).

Allowable Subject Matter

8. Claims 3-7 and 9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- Nishimura et al., US Patent no. 5,197,564 discloses a cruise control apparatus for a vehicle.
- Claussen et al., US Patent no. 6,233,514 discloses a method for controlling the downhill speed of an off-the-road vehicle.
